Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 November 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 15 – 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Hansson et al. (WO 96/20669).

With respect to claim 1, Hansson et al. (hereinafter "Hansson") discloses an absorbent article which as a substantially elongated shape with a longitudinal direction and a transverse direction and exhibits two side edges, a front edge and a rear edge, a front portion and a rear portion, and a central portion situated between the front portion and the rear portion (figure 1), which article furthermore exhibits a liquid pervious cover layer and a liquid impervious cover layer and an absorbent body (page 5, lines 21 – 32) characterized in that the rear portion of the absorbent body comprises a layer (6) that is split into a substantially Y-shaped body having a first leg and a second leg with a gap between the legs where an angle is defined between the first leg and the second leg (page 7, lines 25 – 29) and that an elastic member (5) is placed between the first leg and the second leg which elastic member essentially extends in the longitudinal direction as set forth on page 9, lines 1 – 30.

As to claims 15 and 16, see the rejection of claim 1 and page 10 line 26 to page 11, line 12.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2 – 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hansson et al. (WO 96/20669).

With reference to claim 2, the applicant is reminded that a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 370 F.2d 576, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 312 F.2d 937, 939, 136 USPQ 458, 459 (CCPA 1963).

The examiner contends that the Hansson reference is fully capable of bending the rear portion in a substantially parabolic shape since it too has an elastic member meeting the claimed limitations and is fully capable of performing the recited function.

As to claims 3 and 4, see page 9, lines 18 – 19.

With reference to claim 5, see page 9, lines 32 – 34.

Regarding claim 6, see page 7, lines 21 – 25.

Art Unit: 3761

With reference to claims 7 – 12, absent a critical teaching and/or unexpected result, the examiner contends that the claimed limitation is an obvious matter of design choice that does not patentably distinguish the claimed invention from the prior art.

As to claims 13 and 14, see figures 1 – 2.
